

Church of Scotland Parish Development Fund

Grant application guidelines for the Parish Development Fund, established by last year's General Assembly in response to *Church Without Walls*, are now available.

The Fund aims to encourage local churches to work with others for the benefit of the whole community – and to take risks in living and sharing the Gospel in relevant ways.

A sum of £3 million will be allocated to the Fund over the next five years. Grants will be available for imaginative projects which involve local churches working collaboratively with each other and with people in need.
